

FAA APPROVES PAN AM INTERNATIONAL FLIGHT TO CONDUCT ATP-CTP TRAINING ON BOEING 737NG

News / Maintenance / Trainings

Pan Am International Flight Academy announced today it has been approved by the Federal Aviation Administration (**FAA**) to conduct Airline Transport Pilot Certification Training (**ATP-CTP**) on the **B-737NG**.

The company was approved in early August to conduct ATP-CTP training on the Airbus 320. This additional FAA approval makes Pan Am the only aviation training organization authorized to provide training on both platforms.

The 6-day approved ATP-CTP program consists of 30 hours of academic training including: Aerodynamics, Meteorology, Air Carrier Operations, Leadership, CRM and Safety—and includes 10 hours of training and demonstration (4 hours fixed-base, 6 hours full flight) in either the A-320 or B-737 level D simulator respectively.

As the original training division of former Pan American World Airways, the company is one of the largest and most experienced educational aviation training organizations in the world, with several U.S., Europe and Asia locations and 60 full-motion flight simulators— and over 200 training courses for pilots, flight engineers, air traffic controllers, dispatchers, and flight attendants.

The ATP-CTP course syllabus can be viewed at: <https://www.panamacademy.com/atp-ctp-airline-transport-pilot-certification-training-course>
