

FL TECHNICS TRAINING INTRODUCES ITS MATERIAL MANAGEMENT AND LOGISTICS COURSE IN A NEW VIRTUAL FORMAT

News / Maintenance / Trainings

FL Technics announces an addition of a new training course to its Virtual training portfolio as Part-147 Training Organisation. Since the newly developed FL Technics Logistics Solutions business line requires enhanced knowledge and expertise from the industry specialists, FL Technics Training team has introduced a new Open Class training option for those interested in the subject.

The Material Management and Logistics training course comes in a format of a Virtual classroom and is aimed at providing attendees with thorough knowledge on the requirements and processes associated with material management and logistics in civil aviation. With travel restrictions and recommendations for social distancing in place, this is an excellent opportunity to get into the subject or to develop current experience in it, without even leaving home.

The training course is conducted by Andrej Volodko, Head of Administration and Business Intelligence Unit at FL Technics. The trainer has over 10 years of teaching experience and more than 15 years of professional experience in the industry. Andrej has an abundance of active hands-on knowledge in the processes related to logistics and material management and is an expert with a wealth of practical experience to bring to the classroom.

“We are excited to make this course publicly available and accessible for individual learners interested in the topic. The course provides a solid theoretical and practical background, supported by the expertise of a renowned industry expert, bringing his hands-on experience to the course. The insider’s know-how, as well as the convenient remote training format, make this course particularly attractive for participants,” commented Diana Lisovskaja, Acting Head of Customer support and Application units at FL Technics.

The Material Management and Logistics training course is based on EC Regulations No 1321/2014 and No 748/2012; IOSA Standards Manual; IATA Guidance Material and Best Practices for Inventory Management; ATA Spec 300; CAP 562 – Leaflet D-40.

Registration is open to anyone via 147training.com, with the next group scheduled for June 14, 2021.
