

OMNI PORTUGUESE FLIGHT SCHOOL TRUSTS IN ALSIM AGAIN AND CHOOSES ALX'S FLIGHT SIMULATOR

News / Maintenance / Trainings

Alsim is very pleased to announce the sale of an ALX SEP (Cessna 172) MEP (PA44) and Beech 200 to OMNI Aviation Group, one of the largest private Portuguese aviation groups, located in Portugal with branches in Brazil and Cape Verde.

The OMNI Aviation Group offers expertise and know-how in almost every area of aviation: Commercial Aviation, Business Aviation, Maintenance, Training, Emergency Medical Air Services and Aviation Support Areas (Ground Handling and Consulting).

The OMNI Aviation Training Center (OATC) is one of the companies within the Group, a flight school that offers various aviation training courses and which it's based upon the following principles: Safety, Quality, Demanding Educational standards and Technological Innovation.

The group has been Alsim's client since 2008 and already owned an AL200 MCC. Alsim proposed OMNI a buy back of their old simulator to replace it with an ALX.

Joaquim Oneto, the OMNI Aviation Training Center Head of Training, tells us more about their

choice: “We were very satisfied with our AL200 MCC and Alsim’s after sales service but we needed a simulator that complies with Commission Regulation (EU) 2016/539 and the requirement for performance-based navigation (PBN). The AL200 MCC, although an excellent training tool, does not have that capability. That is the reason why we chose the ALX.”

Audrey Jeffroy, Alsim Sales Director, emphasizes on this continuous partnership: “We were very happy to propose such a great tool to our client OMNI and we know it will help them keeping a high standard of their training.”

About OMNI Aviation Group

Apart from the actual worldwide operation of aircraft and fleet management, the OMNI Aviation Group offers various aviation support services, which perfectly complement the expertise of the Group, creating synergies and enhancing its operational strength.

Expertise in almost every area of aviation with many support solutions

Group with worldwide operations

Training

The Group’s flight school OMNI Aviation Training Center offers initial and recurrent training for pilots, cabin attendants and dispatchers. With its own flight simulator as well as cabin and slide mock-ups, training of the highest standard is offered, from ATR to Airbus A320 and Boeing 777 and helicopters.

Maintenance

Aeromec is an EASA PART M 145, AQAP 2120 and ISO 9001:2008 Maintenance Company based at the Cascais Aerodrome, dedicated to the support of almost every aircraft in the fleet as well as third party. Having its own resources ensures the best versatility to maintain every aircraft airworthy and a fast response when an immediate intervention is required.

Ground Handling

With operations in Portugal (Cascais, Lisbon, Oporto and Faro) and Cape Verde (S. Vicente, Sal, Boavista and Praia), OMNI Handling is dedicated to business aviation ground support services. With a brand new FBO at the Lisbon Airport, OMNI Handling is a reference for the highest level of service and the leading executive ground handling company in Portugal with a market share of over 50%.

Consulting

In its almost 29 years of existence, OMNI developed a significant know-how in almost every area of aviation, which can be made available to other operators, companies and individuals.
