

TAG AVIATION ASIA OPENS NEW TRAINING CENTER IN HONG KONG

News / Maintenance / Trainings

TAG Aviation Asia celebrates the opening of its new training center in Hong Kong!

This state of the art training facility with its modern design and advanced training aids will provide quality training to every guest, colleague and trainee.

EDM Airbus A320 OWE Door Trainer

In addition, TAG Aviation Asia is the first corporate management company in the region to offer training services that include a physical Airbus A320 Over-wing Exit Door Trainer. This trainer is built by EDM to airline specifications and TAG Aviation Asia is in the process of gaining certification for its use as an approved training device. It is available for third party training.

As part of TAG Aviation Asia safety training syllabus, participants will have the opportunity to remove the heavy over-wing exit (19.5kg) and practice evacuations based on emergency situations and realistic training scenarios.

Aircraft Galley and Table Mock Up

To further enhance TAG Aviation Asia's renowned inflight service, a tailor made aircraft galley and table mockup was installed in the training facility to provide trainees with a realistic silver service experience to refine their inflight service skills.

TAG Aviation Asia recognizes the importance of innovation and fostering a culture of continuous improvement. With the high standards of service, quality and personal attention given to our aircrew and clients we aim to remain the benchmark in the industry.
