

WELCOME NEW ALSIM ALSR20 FLIGHT TRAINING DEVICE

News / Maintenance / Trainings

ALSIM expands its range of products with the launch of their brand new ALSR20, an exact replica of the Cirrus SR20 aircraft. The device reproduces the latest Cirrus SR20 specific interior cockpit and flight deck including a real Garmin GDU 1050A and GFC 700 Autopilot. The ALSR20 is further equipped with a Garmin GMA 350C – All digital Audio Panel and a Garmin GCU 479 and can simulate the Cirrus Airframe Parachute System (CAPS).

As with all ALSIM simulators, the ALSR20 gathers the best of the company's technology. The outstanding immersion is provided by the latest VFR-VS image generator and visual system with 210° screen. The instructor station is designed for instructor's comfort and offers two large graphical touch screens to access the IOS. The IOS can also be accessed

by any tablet that can access the internet.

This new simulator joins the family of specific devices produced by AISIM, already consisting of the AL172 (Cessna 172), AL40 and AL42 (Diamond DA40 and DA42).

The ALSR20 is delivered with a two-year warranty and a full range of services including installation, training, maintenance and qualification support. A maintenance spare parts kit is also provided to ensure independence and maximum uptime.

The ALSR20, a Flight Training Device (FTD) Level 5, is compliant with the latest aviation standards from EASA and the FAA to TC (Transport Canada) and the CAAC.
