

AIRBUS' A220 EMBARKS ON A WORLD DEMONSTRATION TOUR

News / Manufacturer

Visiting five cities in four countries to showcase its unbeatable efficiency and comfort

Airbus will fly an airBaltic A220-300 new-generation single-aisle aircraft to five cities in four countries as part of a world demonstration tour.

The A220-300 will first attend the Zhuhai airshow (China) from November 5 until November 8 before flying to Chengdu on November 9. The aircraft will continue on its journey with a stopover in Koh Samui (Thailand) on November 10 before flying to Kathmandu (Nepal) on November 11. After that, the airBaltic A220 will go to Istanbul (Turkey) on November 12 before returning to its home base in Riga (Latvia) on November 14.

The A220 demonstration tour is a great opportunity for Airbus to showcase its newest family member in front of airlines and media, and to offer a close up view of the aircraft's outstanding characteristics, comfort, and performance, that benefit both operators and passengers alike.

airBaltic's A220-300 features a comfortable cabin arrangement able to accommodate 145 passengers in true widebody comfort. The Latvian airline already operates 13 A220-300s

out of a total of 50 ordered.

The A220 is the only aircraft purpose built for the 100-150 seat market, and it delivers unbeatable fuel efficiency and true widebody comfort in a single-aisle aircraft. The A220 brings together state-of-the-art aerodynamics, advanced materials and Pratt & Whitney's latest-generation PW1500G geared turbofan engines to offer at least 20 percent lower fuel burn per seat compared to previous generation aircraft. With a range of up to 3,200 nm (5,020 km), the A220 offers the performance of larger single-aisle aircraft.

With an order book of over 400 aircraft to date, the A220 has all the credentials to win the lion's share of the 100- to 150-seat aircraft market.
