

BOMBARDIER TO SHOWCASE ITS CLASS-LEADING BUSINESS JET PORTFOLIO AT MEBA 2016

News / Business aviation, Events / Festivals, Manufacturer

Bombardier Business Aircraft announced it will showcase its class-defining business aircraft at this year's Middle East Business Aviation Association (MEBAA) show at Al Maktoum International airport in Dubai (UAE) on December 6-8, 2016. The company's most advanced business jets will be on static display, including the *Learjet 75*, *Challenger 650*, *Global 5000* and *Global 6000* aircraft.

"Once again we are delighted to participate in full force at MEBAA with our stellar line-up of business jets," said Peter Likoray, Senior Vice President, Worldwide Sales and Marketing, Bombardier Business Aircraft. "With a very strong team and a fleet of more than 100 aircraft based in the Middle East, Bombardier is well-positioned to build on its current presence as a world-class provider of exceptional business aircraft in the region.

"We expect the Middle East to remain a promising market for business aviation in the next 10 years. Our market forecast predicts 350 deliveries valued at \$12 billion over the next 10 years, with Medium and Large category aircraft accounting for about 95 per cent of these deliveries," he added.

Bombardier continues to grow its leadership position in the business aviation industry with the

most comprehensive product portfolio and a superior service worldwide that provides customers with an outstanding onboard experience.

Learjet 75 aircraft: As part of the pioneer *Learjet* family, the *Learjet 75* aircraft continues to set the standard by bringing large jet features to the most trusted light jet platform. As the only business jet in its class to feature an eight-seat double-club configuration, a flat floor throughout the cabin, and a pocket door for reduced noise levels, the class-defining *Learjet 75* aircraft offers the ultimate in comfort and privacy.

Along with the *Bombardier Vision* flight deck, its modern interior was designed for style and comfort and features a new cabin management system with individual touchscreen monitors and full audio and video control, LED lighting throughout the entire aircraft, and a generous baggage suite.

The *Learjet 75* aircraft's powerful engines and new winglet design enable it to cruise at a speed of Mach 0.81* and climb to an impressive operating ceiling of 51,000 feet (15,545m).* The *Learjet 75* can also achieve an exceptional range capability greater than 2,000 NM (3,704 km),* and can fly four passengers and two crew members non-stop from Dubai to Istanbul.*

Challenger 650 aircraft: A masterful expression of high-end craftsmanship and functionality, the *Challenger 650* aircraft is designed to be the most reliable business aircraft. The *Challenger 650* business jet provides the ultimate in-flight experience with industry-leading connectivity, an immersive sound system, and a cabin management system that effortlessly brings it all together in the widest in-class cabin.

Featuring the *Bombardier Vision* flight deck and state-of-the-art Synthetic Vision System (SVS), MultiScan*** weather radar, and available Head-up Display with Enhanced Vision System (EVS), the aircraft's avionics provide increased situational awareness and reduced pilot workload.

With a true 4,000 NM (7,408 km) range capability*, the *Challenger 650* business jet connects Dubai to London (Farnborough) non-stop* while delivering the lowest direct operating costs in its class. Built upon the most successful large segment business aircraft platform of all time and designed to create an unforgettable experience, the *Challenger 650* aircraft is the first choice among experienced flight departments.

Global 5000 aircraft: By combining expert engineering and superior craftsmanship, every detail on the *Global 5000* aircraft has been meticulously designed to deliver nothing less than what an exceptional private jet should be.

With a cabin that is nearly a foot wider (30 cm) than its nearest competitor, coupled with an advanced wing design that optimizes speed, range and control, the *Global 5000* aircraft delivers maximum comfort and a remarkably smooth and comfortable ride.

The *Global 5000* aircraft also comes equipped with the fastest inflight internet connectivity worldwide** to keep passengers connected in a highly productive working environment.

Boasting impressive range, speed and reliability that blend perfectly to offer outstanding field performance, the *Global 5000* business jet can effortlessly access some of the world's most challenging airports, including Aspen and London City. With a range capability of 5,200 NM (9,630 km)* it can connect Dubai to Tokyo non-stop*.

Global 6000 aircraft: The *Global 6000* business jet features an intelligently crafted interior that

balances luxury with productivity. Offering more cabin volume and floor space than any other aircraft in its class, the *Global 6000* aircraft is nearly a foot wider (30 cm) than its nearest competitor to provide maximum comfort. With its superior Ka-band technology option, the *Global 6000* business jet delivers the industry's fastest inflight internet connectivity worldwide** to keep passengers connected at all times**.

Elevating the customer experience at every possible level, the *Global 6000* aircraft's advanced wing design promotes a smooth and restful flight while the circulation of 100 per cent fresh air ensures passengers stay refreshed.

No other business jet in the ultra-long-range segment today matches the high-speed range capability and mission flexibility delivered by the *Global 6000* aircraft. Providing the ultimate in cabin comfort, this impressive jet can travel 6,000 NM (11,112 km) at Mach 0.85 with eight passengers*, and it can link Dubai to Perth (Australia) non-stop with eight passengers and four crew members*.
