EVIATION ANNOUNCES ORDER FROM AEROLEASE FOR UP TO 50 ALICE ALL-ELECTRIC COMMUTER AIRCRAFT

News / Manufacturer

Eviation Aircraft announced that Aerolease has signed a LOI for up to 50 commuter Alice aircraft. Aerolease is focused on sustainable aviation and will provide financing and leasing solutions for the Alice to a global customer base of operators. The Eviation Alice is a nine-passenger electric aircraft – the only flight-proven all-electric commuter aircraft of its size. Built from a clean-sheet design around magniX's industry-leading electric propulsion system, Alice produces zero carbon emissions and features lower operating costs per flight hour compared to light jets or high-end turboprops – thereby providing the opportunity to activate more routes, improving the convenience of air travel.

Eddie Jaisaree, Vice President, Commercial Sales at Eviation, commented: “As we gather for the Paris Air Show, the aerospace industry is facing increasing pressure to turn sustainable solutions into reality. The Alice aircraft meets the demand for zero-carbon technology that we are seeing from governments, regulators, and the public, while offering a more enjoyable flight experience and lower operating costs. Aerolease further demonstrates the commitment of leasing companies to revolutionize air travel and we are very pleased to receive this order.”

Jep Thornton, Managing Partner of Aerolease, said: “We work with major airlines around the world, and we know from many conversations that sustainability is a major concern. New projects that address sustainability are key to our future strategy and we are excited to be working with Eviation to offer our global customers a zero-emissions solution that is good for the planet and provides an exciting means of opening up new regional routes.”

Gregory Davis, CEO of Eviation, stated: “In the four years since the last edition of the Paris Air Show, Eviation has achieved the world-first test flight of the Alice, and secured over US$ 4 billion in orders. Our aircraft has captured the hearts and minds of the marketplace with its beautiful design, low cost of operation and environmental credentials. The leasing community has an important part to play in creating a long-lasting future for our industry, and we are delighted to work with Aerolease, our latest leasing customer.”
