

# MASTER YOUR AIRCRAFT WITH DIAMOND BRILLIANCE TRAINING

News / Maintenance / Trainings, Manufacturer

**Announced with an OFFICIAL NEW VIDEO RELEASE, Diamond Aircraft Industries launched “DIAMOND BRILLIANCE” a compelling new Factory Authorized training program for their aircraft customers, just in time for Sun’n Fun. Created from the knowledge of the test pilots, engineers, chief instructors, demo pilots, Earth Rounders, and the Diamond aircraft owners all around the world, this empowering and enlightening customized new training experience enables pilots to master their very own Diamond aircraft. DIAMOND BRILLIANCE, which is Factory Authorized Training designed by Diamond Aircraft and Take Flight Aviation, offers customized real-world scenarios for precision flight training and safety procedures, ownership intel, and new insurance advantages.**

Diamond Aircraft is enriching its delivery experience for new aircraft owners offering the new Diamond Brilliance Training Program to enlighten and enhance the knowledge and skills of pilots, equipping them with the expertise specific to owning a new piston twin DA62 or DA42, or DA50 aircraft upgrade, creating Diamond Brilliance pilots.

Trevor Mustard, Head of Aircraft Sales & Marketing at Diamond Aircraft commented: “What I really want a potential owner to understand is, the barriers that prevent them from owning the aircraft that they really want, are being removed with Diamond Brilliance Training.”

Mitch Semel, Chief Instructor at Take Flight Aviation stated: “With Diamond we’ve already got the safest aircraft in general aviation. We’d like to ensure that the Diamond owner population is the safest, smartest, most prepared group of owners out there.”

Ryan Mayo, President at Take Flight Aviation said: “Diamond aircraft have the best safety record of any small aircraft in the air today – period. Nothing else even comes close. We helped build the Brilliance Training Program to customize and maximize the learning experience in the aircraft, and to help Diamond Aircraft owners become the safest pilots.”

One of the most compelling advantages of the Brilliance Training is the vast amount of specific training documentation that is generated for insurance providers, to reduce any obstacles commonly faced by pilots buying a new twin or more complex aircraft.

Bonus features of Brilliance training is that it is standardized, but customized for each aircraft owner to take place where it is most convenient, in New York at Take Flight Aviation, or at the aircraft owner’s home airport anywhere across the North American continent.
