

PHILIPPINE AIRLINES TAKES DELIVERY OF ITS FIRST A321NEO AIRCRAFT

News / Airlines, Manufacturer

Bringing new levels of efficiency and comfort for the carrier's regional network

Philippine Airlines (PAL) has taken delivery of its first A321neo aircraft in Hamburg, Germany.

This is the first of 21 A321neo aircraft ordered by the airline under its fleet renewal programme. Powered by Pratt and Whitney Pure Power engines, the new aircraft features a premium two class layout with 12 business class seats and 154 seats in the main cabin.

Selected for its outstanding operational efficiency, comfort and range, Philippine Airlines will deploy the A321neo aircraft across the Asia-Pacific region, including Australia and India.

The A321neo joins an existing Airbus fleet at Philippine Airlines that currently includes 25 A320ceo Family aircraft, 15 widebody A330s and five A340s. The carrier will also take delivery of the first of six A350-900 widebody aircraft on order later this year.

The A320neo Family incorporates the very latest technologies including new generation engines and Sharklets, which together deliver at least 15 percent fuel savings at delivery and 20 percent by 2020. With more than 6,000 orders received from 100 customers, the A320neo Family has captured nearly 60 percent share of the market.
