

**months, with P3, we have a key tool for this task”.**

**While** P3 will continue the development of the SH09 by performing an intensive flight test campaign in Sicily (Pozzallo, Province of Ragusa), the Kopter team in Mollis will finalize the preparation of the next prototype, the Pre-Series number 4 (PS4), which will join P3 in 2019 to undertake flight testing in Sicily. In addition to its essential contribution to the development aircraft, the Mollis team will set its future focus on upgrading the existing facility into a fully operational commercial production center.

“I am proud of the Kopter team and its ability to develop the next generation single engine rotorcraft” said Andreas Lowenstein, Kopter Chief Executive Officer. “With P3 we are set on the path towards delivery to our customers”. He added: “We have seen a tremendous response from the market for the SH09, which offers the highest standards of safety, mission capability and cost efficiency, which our customers are asking for.”
