

TECNAM AND EVIONICA TO DESIGN THE FUTURE OF AVIATION TRAINING

News / Events / Festivals, Manufacturer

Tecnam and Evionica announced a long-term partnership for an interactive learning platform for student pilots. The first models to be included in the agreement are the P2006T and P2008JC. Others will follow. The collaboration will enable the most comprehensive and detailed insight into Tecnam aircraft, providing a modern and interactive learning experience for pilots.

Flight preparation and safety will be significantly enhanced through Evionica systems and the partnership with Tecnam. Evionica's team of pilots and engineers have flown and worked on Tecnam aircraft and are able to provide immersive and insightful e-learning courses. By sharing our experience, knowledge and love of aviation, Evionica and Tecnam will improve aviation together offering a modern solution for training.

Mateusz Godun, Evionica CEO, commented: “Tecnam is more than just a global aircraft supplier; it is a company with a rich history dating back to 1948. Similarly, Evionica was founded with a passion for flying and a mission to enhance aviation safety, logistics, and training. We are thrilled to announce our new partnership with Tecnam.”

Walter Da Costa, Chief Sales Officer, Tecnam said: “The Tecnam solution for training is ideal for a modern flying school. Aligning with Evionica for a modern learning is a natural fit to provide worldwide students and customers with the support they need.”
